

SEARCH DEMAND x MARKETPLACE SUPPLY

Where Fountain can win next

US market, treatment, paid acquisition, SEO, and GEO
opportunity study

12 demand markets

98 treatments

2,395 returned keyword rows

August 2026

MANDATE

Decision brief

Use the data already captured to decide where Fountain should invest in paid demand, organic search, and AI-answer visibility - without purchasing the \$599 Semrush tier.

What was measured

7,566 treatment and alias queries were designed across 13 metros. Semrush returned usable results for 12 markets.

What was joined

Search demand was matched to Fountain's current treatment taxonomy and active US marketplace supply.

What this report decides

Market priority, treatment plays, campaign design, page architecture, and a 90-day execution order.

The answer: The saved corpus is sufficient for portfolio decisions and launch tests. San Francisco needs a later demand refresh, but it should not block action in the other 12 markets.

SYNTHESIS

Executive answer

Do not buy the tier yet.

The corpus already identifies repeatable demand patterns, supply gaps, and exact launch terms. Spend the next 90 days converting that information into pages, inventory, and controlled campaigns.

Three moves now

1. **DEXA:** the cleanest diagnostic wedge across markets.
2. **Aesthetics:** the largest demand pool, but only when split by treatment and backed by verified providers.
3. **SEO/GEO infrastructure:** expand beyond 30 sitemap-listed treatment-city pages selectively, with richer entity and answer structure.

Two guardrails

1. Do not equate query-basket volume with total local audience or forecasts.
2. Do not promote raw gaps such as Pilates, personal trainers, or generic med spa until taxonomy and strategic fit are resolved.

DATA COVERAGE

The data asset already in hand

7,566

DESIGNED MARKET QUERIES

2,395

RETURNED KEYWORD ROWS

1,071

NATIONAL DISCOVERY ROWS

995

TREATMENT-MARKET
SUMMARIES

Twelve markets are complete or near-complete. Scottsdale missed 50 planned queries and Denver missed 40. San Francisco's 582-query map and marketplace supply are saved, but no Semrush demand rows were returned before access expired.

METHOD

How to read the numbers

1

Taxonomy

98 live Fountain treatments plus curated synonyms and high-volume discovery terms.

2

Localization

Queries localized with one representative city suffix per metro, such as nyc or miami.

3

Demand

Semrush US keyword-volume, CPC, and paid-competition fields captured per returned phrase.

4

Supply

Active, non-virtual US Fountain locations mapped to metro locality sets.

5

Opportunity

A transparent composite ranks demand, demand per mapped location, CPC, and competition.

Query basket volume is the exact sum of measured, deduplicated city-explicit phrases mapped to a treatment. It is a comparative index, not a forecast of all searches occurring inside the metro.

PRECISION

Limits that protect the decision

Known limitation	What it means	Decision treatment
Third-party modeled volume	Semrush volume is an estimate, even when the stored number is exact.	Use for relative prioritization; validate with campaign/search-console observations.
City-explicit phrases	Near-me and unmodified local searches are not included.	Never call the basket total local TAM.
One suffix per metro	Scottsdale represents the Phoenix metro; Dallas represents DFW.	Use metro supply, but test neighboring city variants in launch.
Keyword overlap	Some phrases could fit more than one treatment.	Use canonical landing pages and negatives to prevent internal competition.
Brand contamination	Some discovered terms are provider brands.	Separate or exclude brand campaigns; never infer generic demand from a brand spike.
SF demand absent	No demand rows were returned before credits ended.	Keep SF out of demand rankings; retain its 119-location supply profile.

MARKETS

Market demand ranking

NYC is the largest measured basket. Houston and Chicago form a high-demand, relatively thin-supply second tier. The ranking excludes San Francisco because its API batch was not returned.

MARKET MATRIX

Demand and Fountain supply tell different stories

Houston and Chicago combine large query baskets with far fewer mapped locations than NYC, LA, Miami, or Scottsdale/Phoenix. That creates opportunity only if Fountain can verify enough relevant treatment inventory.

PORTFOLIO

Category mix by market

Rejuvenate is the largest measured category in every market except Las Vegas, where Optimize leads because IV-therapy demand is unusually high. Measure looks smaller because diagnostic demand is concentrated in fewer phrases and some concepts use non-city search language.

OPPORTUNITY LANDSCAPE

Raw gaps require a strategic-fit filter

Pursue: DEXA, specific aesthetics, hair restoration, IV therapy, functional medicine, medical weight loss, selected imaging.

Do not auto-pursue: Pilates, personal trainers, physical therapy, or generic med spa solely because mapped supply is low.

MEASURE

Diagnostics: DEXA is the clearest wedge

DEXA has the best combination of repeatable multi-market demand, understandable consumer intent, moderate CPC, and a service that Fountain already represents.

Launch order: NYC, Austin, Houston, San Diego, Chicago, then Las Vegas. Chicago and Las Vegas are especially supply-thin in Fountain's current mapping.

MEASURE

Imaging demand uses consumer and brand language

Consumer language

full body scan, whole body scan, full body MRI scan, preventive MRI.

Comparison language

Prenuvo scan and Ezra scan appear in local baskets. Treat these as comparison intent, not as proof of affiliation.

The measured MRI basket is 2,960, including 610 in NYC, 340 in Tampa, and 330 in Houston.

SEARCH LANGUAGE

The taxonomy-language bridge

Fountain canonical topic	Search language to incorporate
Full-body MRI	full body scan; whole body scan; Prenuvo scan; Ezra scan
DEXA scan	DEXA body composition; body composition scan; bone density test
Medical weight loss	weight loss clinic; weight loss doctor; weight loss program
IV Infusions	IV therapy; IV drip; IV hydration; mobile IV; IV lounge
Hormone optimization	hormone clinic; hormone specialist; bioidentical hormone therapy
Microneedling	RF microneedling; Morpheus8; collagen induction therapy

Fountain should keep medically precise canonical names, but page titles, copy, internal search, and ad groups need the terms people actually use.

COVERAGE GAP

San Francisco: known supply, missing demand

119

active metro locations

911

offerings

94

organizations

582

planned queries saved for a future refresh

Decision: keep San Francisco in product and SEO infrastructure work, but do not rank or allocate paid budget based on unmeasured demand. First use Search Console and internal behavior; buy a narrow one-off data refresh later only if needed.

What can proceed now

- Inventory QA and treatment-city page enrichment.
- Schema and crawler work that applies nationally.
- First-party measurement for existing SF pages.

CATEGORY STRATEGY

Measure

Use DEXA as the paid wedge; build MRI, screening, and performance testing as evidence-heavy organic assets.

Topic	12-market basket	Mapped supply	Median score
DEXA scan	9,610	74	79.2
Sleep study	3,120	18	65.5
Full-body MRI	2,960	143	54.2
Cancer screening	1,470	23	53.4
Genetic testing	1,130	21	54.6
VO2 max test	800	42	40.3
Executive health checkup	470	25	38.9

CATEGORY STRATEGY

Optimize

Prioritize IV in Las Vegas, medical weight loss in Houston, and functional medicine only after filling inventory gaps.

Topic	12-market basket	Mapped supply	Median score
IV Infusions	28,830	484	80.7
Pilates	22,520	4	89.7
Medical weight loss	15,520	200	78.0
Functional medicine	10,880	79	79.3
Personal Trainer	9,480	1	87.8
Hormone optimization	8,650	205	63.4
Ketamine therapy	5,050	0	72.4

CATEGORY STRATEGY

Recover

Favor comparison-led SEO for HBOT, red light, sauna, cryotherapy, and recovery bundles; paid economics are less compelling at current supply levels.

Topic	12-market basket	Mapped supply	Median score
Physical therapy	21,680	26	81.6
Acupuncture	9,850	71	80.6
Hyperbaric oxygen therapy	5,540	156	63.9
Massage therapy	5,030	40	72.5
Group Therapy	3,450	1	53.8
Red light therapy	3,420	209	55.6
Cold plunge	3,240	84	61.4

CATEGORY STRATEGY

Regenerate

Keep claims and evidence standards high. Use modality education and provider credentials before aggressive paid scale.

Topic	12-market basket	Mapped supply	Median score
PRP therapy	6,140	257	58.1
Stem cell therapy	4,550	185	56.0
Peptide therapy	3,750	241	53.6
Exosome therapy	540	108	26.6

CATEGORY STRATEGY

Rejuvenate

This is the largest demand pool. Split by treatment, market, price, downtime, and credentials; generic med-spa intent is too noisy.

Topic	12-market basket	Mapped supply	Median score
Botox	31,380	158	84.1
Med spa	29,210	91	90.8
Microneedling	21,740	150	88.2
Hair restoration	21,610	120	85.9
Laser hair removal	20,180	68	92.1
Dermal fillers	19,350	128	83.9
Hydrafacial	8,760	45	84.7

DEXA PLAY

A repeatable diagnostic acquisition loop

Intent

dexa scan nyc and close variants, separated by service meaning.

Landing promise

Verified local providers, transparent filters, and factual treatment guidance.

Conversion

Provider detail view or outbound booking action, not raw page traffic.

Market	Basket	Top observed query	CPC	Supply
New York City	1,930	dexa scan nyc	\$2.31	8
Austin	1,060	dexa scan austin	\$4.04	11
Houston	980	dexa scan houston	\$1.46	8
San Diego	940	dexa scan san diego	\$2.59	6
Chicago	930	dexa scan chicago	\$2.23	3
Las Vegas	630	dexa scan las vegas	\$1.21	1

AESTHETICS PLAY

Capture treatment demand, not generic med-spa noise

Intent

microneedling chicago and close variants, separated by service meaning.

Landing promise

Verified local providers, transparent filters, and factual treatment guidance.

Conversion

Provider detail view or outbound booking action, not raw page traffic.

Market	Basket	Top observed query	CPC	Supply
Chicago	2,760	microneedling chicago	\$3.48	0
Houston	2,190	microneedling houston	\$3.00	2
Miami / South Florida	1,870	microneedling miami	\$3.17	7
Los Angeles	1,910	microneedling los angeles	\$3.78	13
Denver / Boulder	1,910	microneedling denver	\$3.77	7
San Diego	1,330	microneedling san diego	\$5.11	3

HAIR RESTORATION PLAY

High commercial intent supports a vertical

Intent

hair transplant nyc and close variants, separated by service meaning.

Landing promise

Verified local providers, transparent filters, and factual treatment guidance.

Conversion

Provider detail view or outbound booking action, not raw page traffic.

Market	Basket	Top observed query	CPC	Supply
New York City	3,840	hair transplant nyc	\$8.22	29
Miami / South Florida	2,800	hair transplant miami	\$5.71	7
Chicago	2,780	hair transplant chicago	\$8.97	3
Houston	2,400	hair transplant houston	\$9.23	4
Los Angeles	1,900	hair transplant los angeles	\$7.63	14
Denver / Boulder	1,230	hair transplant denver	\$12.09	7

IV THERAPY PLAY

Las Vegas is the standout local test

Intent

iv therapy las vegas and close variants, separated by service meaning.

Landing promise

Verified local providers, transparent filters, and factual treatment guidance.

Conversion

Provider detail view or outbound booking action, not raw page traffic.

Market	Basket	Top observed query	CPC	Supply
Las Vegas	4,380	iv therapy las vegas	\$6.11	23
New York City	3,510	iv drip nyc	\$4.64	143
Miami / South Florida	3,190	iv therapy miami	\$5.90	59
Houston	2,600	iv therapy houston	\$3.91	24
Austin	2,580	iv therapy austin	\$6.16	29
Chicago	2,230	iv therapy chicago	\$4.05	9

MEDICAL WEIGHT LOSS PLAY

Recurring care with strong Houston whitespace

Intent

weight loss clinic houston and close variants, separated by service meaning.

Landing promise

Verified local providers, transparent filters, and factual treatment guidance.

Conversion

Provider detail view or outbound booking action, not raw page traffic.

Market	Basket	Top observed query	CPC	Supply
Houston	3,090	weight loss clinic houston	\$5.61	5
Tampa Bay	1,750	weight loss clinic tampa	\$5.54	12
New York City	1,410	medical weight loss nyc	\$4.10	59
Los Angeles	1,360	medical weight loss los angeles	\$2.63	15
Las Vegas	1,310	weight loss clinic las vegas	\$3.05	10
Miami / South Florida	1,180	weight loss clinic miami	\$5.62	11

FUNCTIONAL MEDICINE PLAY

A supply-development opportunity first

Intent

functional medicine doctor nyc and close variants, separated by service meaning.

Landing promise

Verified local providers, transparent filters, and factual treatment guidance.

Conversion

Provider detail view or outbound booking action, not raw page traffic.

Market	Basket	Top observed query	CPC	Supply
New York City	1,990	functional medicine doctor nyc	\$1.66	55
Los Angeles	1,170	functional medicine los angeles	\$2.73	3
Austin	1,130	functional medicine austin	\$3.01	2
Houston	1,040	functional medicine houston	\$1.06	0
Denver / Boulder	1,000	functional medicine denver	\$2.33	2
Chicago	770	functional medicine chicago	\$2.45	0

HORMONE CARE PLAY

Segment broad demand, TRT, and menopause care

Intent

hormone therapy miami and close variants, separated by service meaning.

Landing promise

Verified local providers, transparent filters, and factual treatment guidance.

Conversion

Provider detail view or outbound booking action, not raw page traffic.

Market	Basket	Top observed query	CPC	Supply
Miami / South Florida	1,480	hormone therapy miami	\$5.91	16
Houston	1,380	hormone replacement therapy houston	\$0.07	5
Tampa Bay	880	hormone replacement therapy tampa	\$0.00	8
Dallas / Fort Worth	770	hormone replacement therapy dallas	\$0.00	26
Denver / Boulder	740	hormone replacement therapy denver	\$0.00	10
Los Angeles	720	hormone replacement therapy los angeles	\$0.00	11

RECOVERY STACK PLAY

Use organic comparison content before broad paid scale

Intent

hyperbaric chamber san diego and close variants, separated by service meaning.

Landing promise

Verified local providers, transparent filters, and factual treatment guidance.

Conversion

Provider detail view or outbound booking action, not raw page traffic.

Market	Basket	Top observed query	CPC	Supply
San Diego	710	hyperbaric chamber san diego	\$1.48	9
New York City	660	hyperbaric chamber nyc	\$2.41	38
Houston	590	hyperbaric chamber houston	\$1.40	9
Las Vegas	490	hyperbaric chamber las vegas	\$2.14	5
Los Angeles	490	hyperbaric chamber los angeles	\$1.63	19
Miami / South Florida	490	hyperbaric chamber miami	\$1.44	21

RECOMMENDATION 1 / 10

Make DEXA the diagnostic acquisition wedge

Ads + SEO + GEO

NYC, Austin, Houston, San Diego, Chicago, Las Vegas

Why now: 9,610 searches in the measured city-keyword basket. NYC contributes 1,930; Austin 1,060; Houston 980; San Diego 940; Chicago 930. Las Vegas has 630 against only 1 mapped location.

ADS

Launch exact and phrase groups for dexa scan, dexa body composition, body composition scan, and bone density test by city. Split diagnostic/body-composition intent from osteoporosis intent. Route only to inventory-backed pages.

SEO

Build one complete DEXA hub and qualified city pages with price range, what the scan measures, preparation, scan duration, and provider comparison. Prioritize the six markets above.

GEO

Add concise answer blocks for cost, accuracy, radiation, and DEXA vs InBody; expose provider count, addresses, and booking paths in crawlable HTML and ItemList markup.

Success measure

Qualified outbound clicks per 100 paid visits; non-brand top-10 rankings for DEXA + city; provider-page click-through rate.

RECOMMENDATION 2 / 10

Use aesthetics as the paid-demand engine, with a fit filter

Ads

Houston, Chicago, Miami, Los Angeles, Austin, San Diego

Why now: Rejuvenate is the largest measured category in 11 of 12 covered markets. Laser hair removal, microneedling, Botox, and hair restoration repeatedly combine high city demand with sparse mapped inventory.

ADS

Start with exact high-intent treatment-city terms, not broad med spa. Separate Botox, microneedling, laser hair removal, fillers, and hair restoration into distinct campaigns and landing pages.

SEO

Create modality pages and treatment-city comparisons. Do not publish generic med-spa pages unless taxonomy and provider coverage are first fixed.

GEO

Make prices, treatment areas, downtime, credentials, and provider availability machine-readable and visible. Avoid unsupported outcome claims.

Success measure Cost per qualified provider click, lead-to-booking proxy, landing-page coverage rate, and query-level negative-keyword rate.

RECOMMENDATION 3 / 10

Build a dedicated hair-restoration vertical

Ads + SEO

NYC, Miami, Chicago, Houston

Why now: Measured baskets are 3,840 in NYC, 2,800 Miami, 2,780 Chicago, and 2,400 Houston. Weighted CPC is roughly \$5.71-\$9.23, a strong commercial-intent signal.

ADS

Test hair transplant, hair loss clinic, and PRP hair restoration in separate groups. Exclude jobs, training, products, and before/after browsing if the page cannot satisfy them.

SEO

Publish a vertical that compares transplant, PRP, medications, and regenerative options, then links to matched local providers.

GEO

Use clinician-reviewed treatment comparison tables with candidacy, recovery, price structure, evidence strength, and provider credential fields.

Success measure

Revenue or qualified click value per search; organic share of non-brand hair-restoration clicks; assisted conversions.

RECOMMENDATION 4 / 10

Own Las Vegas IV intent before expanding nationally

Ads Las Vegas first; Miami, Houston, Austin, Chicago second

Why now: Las Vegas has a 4,380 IV-infusion query basket, the highest of all markets, with 23 mapped providers. NYC is larger in supply (143) but lower demand per mapped location.

ADS

Create separate clinic, mobile IV, hydration, vitamin IV, and IV lounge groups. Keep intent and claims tightly controlled; exclude emergency and at-home DIY searches.

SEO

Build a Las Vegas IV guide with neighborhood coverage and mobile-vs-clinic filters before copying the playbook elsewhere.

GEO

Answer availability, service area, hours, formulations, supervision, and contraindication questions using visible data sourced from providers.

Success measure Provider click yield by intent group, mobile-vs-clinic conversion, and inventory match rate.

RECOMMENDATION 5 / 10

Reframe MRI around the language consumers actually use

SEO + Ads

NYC, Tampa, Houston, Los Angeles, Miami

Why now: The expanded MRI basket is 2,960 across covered markets. Top language is often full body scan or a provider brand, not Fountain's canonical Full-body MRI label. NYC leads at 610; Tampa 340; Houston 330.

ADS

Bid on generic full body scan and whole body MRI terms; keep brand-comparison groups separate and avoid implying affiliation with Prenuvo or Ezra.

SEO

Consolidate synonyms into a single authoritative hub, with comparison pages for full-body MRI vs CT and brand-vs-independent-provider searches.

GEO

Provide an evidence-reviewed section on limitations, incidental findings, contrast, eligibility, price, and what is and is not screened.

Success measure

Generic-to-brand click mix, query coverage, provider clicks, and zero misleading-affiliation incidents.

RECOMMENDATION 6 / 10

Fill functional-medicine inventory gaps before buying scale

Supply + SEO

Houston, Chicago, Austin, Los Angeles, Denver

Why now: Houston shows 1,040 searches and zero mapped locations; Chicago 770 and zero; Austin 1,130 with 2; Los Angeles 1,170 with 3; Denver 1,000 with 2.

ADS

Do not scale campaigns into zero-inventory pages. Use low-budget exact tests only after provider onboarding and page QA.

SEO

Prioritize provider acquisition, taxonomy cleanup, and service verification, then publish city pages with filters for virtual care, labs, specialties, and care model.

GEO

Explain what functional medicine means on Fountain, how providers are verified, and how it differs from primary or integrative care.

Success measure

Verified providers per priority market, inventory-backed query coverage, and zero-result landing rate.

RECOMMENDATION 7 / 10

Test medical weight loss as a recurring-care category

Ads + SEO

Houston, Tampa, Denver, Chicago, Miami

Why now: Houston leads with 3,090 against 5 mapped locations. Tampa has 1,750; Denver 980 with 4; Chicago 930 with 3; Miami 1,180 with 11. CPCs are mostly \$4-\$6, with Austin higher.

ADS

Split clinic/doctor/program intent from drug-name intent. Use exact location terms first; require strong landing-page disclosures and avoid guaranteed-result copy.

SEO

Create medical weight-loss city pages and a separate GLP-1 education architecture, with eligibility, monitoring, pricing model, and provider credentials.

GEO

Publish reviewed answers about prescription requirements, ongoing monitoring, side effects, and how listings are selected.

Success measure

Qualified click rate, returning-user rate, treatment-to-provider conversion, and policy disapproval rate.

RECOMMENDATION 8 / 10

Segment hormone demand instead of using one broad page

SEO + controlled Ads

Miami, Houston, Tampa, Denver, San Diego

Why now: Broad hormone optimization demand is strongest in Miami (1,480) and Houston (1,380). TRT is strongest in San Diego (610), Tampa (580), and Denver (460). Menopause-specific city wording was under-captured and needs organic validation.

ADS

Separate general hormone care, TRT, and menopause care. Never let generic campaign copy imply a diagnosis or guaranteed outcome.

SEO

Create distinct hubs for hormone optimization, TRT, and menopause HRT with clinician review, then city pages only where inventory is verified.

GEO

Use question-led pages on testing, monitoring, risks, and specialist types. Show reviewer identity and update dates.

Success measure Segment-level conversion, clinical-review completion, organic impressions for menopause questions, and disapproval rate.

RECOMMENDATION 9 / 10

Turn the dynamic directory into a selective search surface

SEO platform

All covered markets; San Francisco after demand validation

Why now: Only 30 treatment-city URLs are explicitly included in the current sitemap, while 98 treatments and far more inventory-backed combinations exist. Current pages emit BreadcrumbList but not provider ItemList or LocalBusiness data.

ADS

Require every campaign URL to pass an automated inventory, canonical, status, and content-depth check before activation.

SEO

Generate sitemap entries only when a treatment-city pair passes demand, inventory, and uniqueness thresholds. Add editorial modules, related treatments, neighborhoods, and crawlable provider summaries.

GEO

Add ItemList for result sets and LocalBusiness/MedicalBusiness data on eligible provider pages, matching visible facts exactly.

Success measure

Indexed qualified pages, impressions per indexed page, zero-result rate, canonical errors, and provider-data freshness.

RECOMMENDATION 10 / 10

Instrument GEO as a measurable distribution channel

GEO foundation

National architecture, market-specific answers

Why now: Fountain already allows OAI-SearchBot and other discovery crawlers while blocking training crawlers. The remaining gap is answer-ready content, entity structure, citations, and referral measurement.

ADS

Keep OAI-AdsBot accessible if testing ChatGPT ads; validate paid landing pages independently from search crawler policy.

SEO

Preserve normal crawl/index fundamentals, strong internal links, textual content, and structured data that matches the page. No special AI file is required by Google.

GEO

Add concise sourced answers, methodology, reviewer/date, provider facts, and stable entities. Track ChatGPT referrals with utm_source=chatgpt.com and build an AI-citation benchmark.

Success measure AI referral sessions, cited-answer share across a fixed prompt set, provider clicks from AI referrals, and source freshness SLA.

OPERATING PLAN

90-day execution roadmap

Days 0-30

Inventory QA, baseline tracking, DEXA page template, crawler/schema implementation, ad account structure.

Days 31-60

Launch DEXA and two aesthetics tests; publish first qualified city pages; begin hair restoration vertical.

Days 61-90

Scale winners, launch Las Vegas IV and Houston weight loss, prune weak pages, run AI citation benchmark.

PAID ACQUISITION

Budget gates - not a budget guess

Stage	Rule	Stop condition
Probe	Exact and phrase only; one treatment-city per ad group.	No relevant inventory clicks after a pre-set sample.
Prove	Add aliases and controlled neighboring geographies.	Query quality or page-match rate deteriorates.
Scale	Increase only when downstream provider value is observed.	Spend grows faster than qualified outcomes.

CPC is useful for commercial-intent and test-cost context; it is not a Fountain performance forecast.

SCORECARD

Measurement system

Layer	Primary metric	Diagnostic metrics
Ads	Cost per qualified provider click	Search-term relevance, zero-result rate, landing engagement, disapprovals
SEO	Non-brand organic provider clicks	Indexed qualified pages, impressions/page, top-10 treatment-city terms, crawl waste
GEO	AI referral provider clicks	Citation share across benchmark prompts, answer accuracy, source freshness
Marketplace	Provider availability after click	Verified inventory, stale records, duplicate organizations, booking-path integrity

Instrumentation rule: join campaign/search query, landing treatment-city, provider result set, outbound click, and any available downstream booking signal. Without that chain, paid optimization will select cheap clicks rather than useful demand.

FOUNTAIN TODAY

Technical SEO and GEO audit

Already strong

- Discovery crawlers such as Googlebot, OAI-SearchBot, ChatGPT-User, Claude-SearchBot, and PerplexityBot are explicitly welcomed.
- Training/bulk crawlers are separated from discovery crawlers.
- Treatment and treatment-city routes have canonical metadata and BreadcrumbList.

Highest-impact gaps

- Only 30 fixed treatment-city URLs are emitted by the sitemap.
- Directory result pages do not currently expose provider ItemList structured data.
- LocalBusiness/MedicalBusiness facts need stronger page-level entity markup.
- Thin dynamic pages need a qualification rule, not mass indexation.

Implementation sequence: thresholded sitemap expansion -> crawlable provider summaries -> ItemList and business entities -> treatment FAQs/evidence -> first-party query and AI referral measurement.

REPRODUCIBILITY

Data appendix

Artifact	Rows / role
market-study-keyword-map.csv	7,566 designed market-query mappings
market-study-keyword-results.csv	2,395 analyzed Semrush keyword rows
market-study-topic-opportunities.csv	995 treatment-market aggregates
market-study-category-summary.csv	Category-market rollups
market-study-market-summary.csv	12 covered market summaries
market-study-supply.csv	Fountain metro supply by treatment
market-study-treatment-inventory.csv	US location coverage by treatment
raw/semrush-discovery/*.csv	1,071 broad national discovery rows
raw/semrush-markets/*.csv	12 saved market response files

All values in this report are reproducible from the saved files. Re-running the report does not call Semrush.
